

SONY

XBR85Z8H

Z8H® 8K HDR LED TV

Astonishing detail is revealed with 8K resolution¹ and the processing power to match. The Picture Processor X1™ Ultimate upscales everything you watch on the Z8H to brilliant near-8K HDR levels.² Vibrant colors, incredible clarity, and amazing contrast create a picture unlike anything you've experienced before on a TV display.

Bullets

- Everything is upscaled to near-8K HDR picture quality with the powerful Picture Processor X1™ Ultimate and 8K X-Reality PRO.^{1,2}
- See exactly what the creator intended with the advanced color and gradation of TRILUMINOS™ Display.
- Enhanced brightness, incredible contrast with Full Array LED and 8K X-tended Dynamic Range PRO 14x.
- With easy access to all your favorite content, services and devices, Sony Android Smart TVs make life simpler.⁴
- On-screen action and motion look better than ever with X-Motion Clarity™ technology.
- X-Wide Angle satisfyingly preserves color and brightness when viewing from anywhere in the room.
- Acoustic Multi-Audio with vibrating Frame Tweeter creates a unique truly immersive sound experience.
- Picture and sound are automatically adjusted to your environment with Sony's unique Ambient Optimization technology.
- Compatible with Google Home⁶, Amazon Alexa⁷, and Apple HomeKit⁸ for an even smarter home.
- See the big picture with HDR¹, Dolby Visions™⁹, IMAX Enhanced™¹⁰ and Netflix Calibrated Mode.¹¹
- Bring home the big-screen 8K experience with a minimalist one-slate design and thin aluminum bezel.¹²
- Premium dual position metal stand that can be adapted for wide or narrow stand.
- Premium brushed aluminum, backlit remote with Bluetooth®¹⁴ connectivity for interference free control of your TV.¹³
- CalMAN™ auto calibration mode makes high-performance screen calibration easier than ever.¹⁵

Features

Picture Processor X1™ Ultimate, powering extraordinary resolution.

Any kind of content can be upconverted to lifelike 8K resolution with Sony's unique features. Our Picture Processor X1™ Ultimate precisely analyses and processes data to power 8K pictures with four times the resolution of 4K for scenes rich in depth, texture and detail. Even images filmed in 4K and Full HD are upscaled close to 8K resolution by 8K X-Reality™ PRO using a unique 8K database. Content is then further enhanced by Object-based Super Resolution to reproduce virtually real world textures. Every single pixel is enhanced beautifully by Sony's Picture Processor X1™ Ultimate.^{1,2}

TRILUMINOS™ Display, enhanced by 8K resolution.

A screen with four times the resolution of 4K¹ is equipped to show even more precise shades of color. By widening the color spectrum, TRILUMINOS™ Display, powered by the Picture Processor X1 Ultimate, reproduces more colors than a conventional television. It analyzes and processes data in every image to make colors even more natural and precise, so pictures are closer than ever to real life. See exactly what the creator intended with the advanced color, light, and gradation of the TRILUMINOS™ Display.

Enjoy the precision of true-to-life contrast

To bring out the intense depth and detail of 8K resolution¹, Full Array LED precisely balances light output across the screen to ensure scenes are full of breathtaking contrast. By controlling light levels in sections of the screen independently, content feels more true-to-life by making light areas lighter and dark areas darker. Contrast is further enhanced by 8K X-tended Dynamic Range™ PRO 14x, which gives the screen 14 times the contrast range of a conventional edge-lit LED TV³, creating higher peak brightness in highlights and detailed blacks in shadow.

Watch what you love, control it with your voice.

Sony's Android TV with the Google Assistant provides a smarter viewing experience. Easily search and watch your favorite movies, get answers on screen like sports scores or weather updates, control your TV and even your home - all with your voice. Just start with "Hey Google" to ask it questions, control smart home devices or access many of the apps and services you already use every day.⁴ In addition, cast your favorite apps with Chromecast built-in⁵, or enjoy a huge range of apps from Google Play™, including YouTube™, Netflix, Prime Video, Spotify, and more.⁴

Bright and clear motion

Scenes appear as they do in real life with X-Motion Clarity™ technology. This revolutionary, best in class technology from Sony refines action on the screen in real time with an incredible refresh rate for action that is brighter and clearer than ever before.

Beautiful colors from any angle.

Watching TV from the sides is now as satisfying as from the center. Sony's X-Wide Angle technology preserves vivid real-world colors from any angle while retaining more brightness than other LED TVs. Enjoy a great picture with incredible from anywhere in the room.

Hear truly immersive sound from the right place in the scene

Sound on conventional TVs with speakers located below the screen is often out of sync with the picture. Our Acoustic Multi-Audio™ includes a vibrating Frame Tweeter, a speaker that enables sound to follow the action for a truly immersive experience. Independent amps are controlled separately to precisely manage sound positioning of this speaker in high tone areas, enhancing sound pressure and stability for more realism. With a subwoofer integrated into the rear of the TV, you'll hear more dynamic, bass-heavy sound –ideal for action movies and music.

Supreme pictures and sound, whatever the environment.

Sit back and enjoy the best possible viewing experience. Sony's unique Ambient Optimization technology automatically adjusts picture and sound to your environment. An embedded light sensor optimizes picture brightness to room conditions, boosting brightness in light rooms and reducing it in dark ones, so you get the perfect view. For uncompromised sound, Acoustic Auto Calibration analyzes the room's environment and reproduces sound that's enhanced and optimized to your room.

Well-connected to your smart home

With Google Home⁶ and Amazon Alexa⁷ compatibility, simply voice-control your TV and ask it to do things like cast and control videos from YouTube with Google Home or change the channel or volume with Amazon Alexa. Apple HomeKit and Airplay 2 support seamlessly integrate your iPhone and Siri devices with your Sony TV for effortless smart home management and content streaming.⁸

See the big picture with HDR, Dolby Visions, IMAX Enhanced and Netflix Calibrated Mode

High Dynamic Range (HDR) picture is the way TV was always meant to be watched. Ultra high resolution and HDR video content combine to bring dazzling detail, color and contrast to everything you watch, while keeping a far wider range of brightness.¹ Dolby Vision™ brings scenes to life with striking highlights, deeper darks and vibrant colors.⁹ The IMAX Enhanced™ program brings the immersive entertainment experience into the home. IMAX Enhanced content is digitally remastered to provide sharper images and more powerful sound—just as the creator intended.¹⁰ Netflix Calibrated Mode was specially developed to enjoy Netflix original content and reproduce picture quality as brilliant as the studio evaluation monitor, faithfully reproducing the creator's intent and vision.¹¹ Whichever format, Sony TVs deliver picture-perfect reality, creating an immersive and engaging cinematic experience.

Big 8K screen, distraction free.

With its minimalist one-slate design and thin bezel, the Z9G 8K LED TV brings home the big-screen 8K experience while blending harmoniously in any room environment. The narrow aluminum bezel keeps you focused on the picture, not the television. Cable holders keep wires neatly hidden, so your television stays free of clutter and looks good from any angle.¹²

Premium dual position metal stand.

Our minimalistic stand sits discretely on a shelf and won't compromise your viewing experience. With outside and inside settings, you can use it on wide or narrow stands.

Beautifully designed and visible in the dark with backlit remote.

Our premium design remote in brushed aluminum with hairline finish feels good in the hand and harmonizes with your living room.¹³ Control your TV even if there are objects in the way with Bluetooth® connectivity¹⁴ and use a variety of simple one push buttons to easily manage key functions. Simply hold up the remote with backlight integrated to change channels and volume when watching TV in darkness.

Experience content as the director envisioned

When pictures are digitally compressed from film to TV, quality is compromised and your experience is not as the director intended in the studio. A wide range of unique features lets you enjoy studio-quality entertainment in your own home, just as the director envisioned.

High performance calibration for professionals

Our TVs receive high performance calibration that has never previously been possible using CalMAN™ software. It allows adjustments to be made with finer precision than conventional picture quality settings to meet the strict requirements of creators in the post-production stage. Colors are reproduced with maximum fidelity to the original TV signal, giving exceptional picture control for a TV. CalMAN also features an easy-to-use interface that has been well received by calibration specialists.¹⁵

1) 8K: 7,680 x 4,320 pixels. 4K: 3,840 x 2,160 pixels. Requires HDR compatible content from supported streaming services, such as Netflix, Amazon Video or HDR compatible content device connected via HDMI input. Requires HDMI® cables sold separately

2) Upscaled, simulated and enhanced 8K and 4K images will vary based on source content.

3) This is the perceptible contrast level expanded by X-tended Dynamic Range PRO technology, which is a unique figure calculated for the contrast that users actually feel and experience (XDR Contrast). This figure is based on our conventional

TV without local dimming.

4) User must connect to a Google account to use, including voice to activate linked apps. Wireless connectivity requires 802.11 home network (802.11n recommended). Network services, content, and the operating system and software of this product may be subject to separate or third party terms and conditions and changed, interrupted or discontinued at any time and may require fees, registration and credit card information. Apps must be compatible with TV. App availability varies by region and device. Use of this TV requires consent to Google Terms of Service (<http://www.google.com/policies/terms/>) and Privacy Policy (<http://www.google.com/policies/privacy/>).

5) Chromecast built-in compatibility dependent on app.

6) Google Home device (sold separately) compatible with Sony TV's powered by Android TV. Requires compatible devices connected to the same wireless home network. Download the Google Home app from the iPhone App Store or Google Play. Subject to third party app terms and conditions. User must link compatible devices in order to control operation. Once

download is complete, the Google Home feature may be connected to the Sony device to access the voice control function

7) Amazon Alexa enabled devices (sold separately) compatible with Sony TV's powered by Android TV. Amazon account required. Subscriptions may be required to access certain content.

8) This Sony TV is compatible with AirPlay 2 and HomeKit. iOS 12.2 or later or macOS 10.14.4 or later is required. Apple ID account required. Subscriptions may be required to access certain content. AirPlay firmware update is required and will be available in winter 2020.

9) Dolby Vision content is compatible with streaming services such as Netflix, Amazon Video or compatible content device connected via HDMI input. Requires HDMI[®] cables sold separately.

10) IMAX Enhanced content enables the full IMAX Enhanced experience.

11) Netflix streaming membership required. 4K Ultra HD availability subject to your Netflix subscription plan, internet service, device capabilities, and content availability. www.netflix.com/termsfuse

12) Actual look may differ depending on TV size and type of cables used.

13) Remote design may differ depending on country.

14) Interoperability and compatibility among Bluetooth[®] devices vary.

15) Requires separately sold CalMAN calibration software to be installed on your PC, a pattern generator, a meter (colorimeter, spectrophotometer etc.), and CalMAN for BRAVIA app to be downloaded from Google Play and installed on your TV. Internet needed to utilize app services on TV. Network services, content, and software of this product may be subject to separate terms and conditions and changed, interrupted or discontinued at any time and may require fees, registration and credit card information.
